

Amendments to the drawings:

The attached two (2) replacement sheets of drawings includes changes to FIG. 1-3 and reprinted FIG. 4. Specifically, peak pick values above the NMR spectra, integral areas from under the horizontal axis, and NMR parameters along the left side of the spectra have been deleted from FIGS 1-3. FIG. 4 has been reprinted with lines, numbers, and letters that are uniformly thick and well defined, clean, durable, and black. No new matter is added.

Attachments: Two (2) Replacement Sheets

REMARKS

Claims 1-9, 11-22, and 24-36 are pending in the application, and were allowed in the Notice of Allowance dated June 22, 2004.

The drawings were objected to because

1. Figures 1-4 contained lines, numbers and letters are not uniformly thick and well defined; and
2. Figures 1-3 contained numbers, letters, and reference characters of less than 1/8 inch in height

FIGS 1-3 have been amended to delete extraneous text. No new matter is added. Specifically, the peak pick, integral values and print out of certain NMR parameters have been deleted from the spectra presented in each of FIGS 1-3.

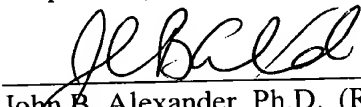

FIG. 4 has been reprinted with uniformly thick and well defined lines, numbers and letters. The content and subject matter of FIG 4 has not been altered.

It is believed that FIGS. 1-3, as corrected, and FIG. 4 as reprinted, in view of the above provided explanation are sufficient to overcome the drawing objection.

Approval of the drawings, and issuance of the patent are respectfully requested.

December 1, 2004

Respectfully submitted,

John B. Alexander, Ph.D. (Reg. No. 48,399)
